*based on estimated construction costs of public infrastructure costs and is intended to cover the engineering review of the preliminary plan, final plat and inspection work during the project or development. The 3.0% fee is only charged once for a particular project or development. Further amendments to the Taylorville City Code (eg. 11-5-3) should include that the aforesaid estimated construction costs for public infrastructures should be calculated by the City Engineer after his review of the construction plans and the engineer's bill should be submitted to the City shortly after such review and any City motion to approve the final plat shall be conditioned upon payment of said 3.0% fee.
